

OGSA 19, Session 14: Whither OGSA 2.0?

Note Taker: DKF

Present:

Andreas
Hiro
Steve
Steven (session leader)
Dave
Andrew
Donal

Steven: Summarized strategy discussions

Steven: ***Issues***

Low adoption in real products (OK for prototypes/demos)

Low customer awareness

Shrinking core group (especially industrial participants)

Confused message (also OGF)

Steven: ***Target***

Set of specs to address business use cases

Andrew: Need to demonstrate solutions; currently only got components for building solutions

Steven: ***Forms of Client***

Browser (Web 2.0, Java applet, javascript)

Traditional OS connector (e.g. from shell envs)

APIs (e.g. SAGA, from Browser, from OS)

Steven: APIs in Access Layer

Multiple bindings

API for the cloud (stubs, mashups)

Dave: Mashups usually tightly coupled to underlying resources

[General Q: Do we jump on the cloud computing bandwagon?]
