June 29, 2004

Agenda:
 GGF12 plans
 Document (Andreas to hand off to Darren sometime this week).
 XML Schema

Attendees:
 Darren P.
 Subir R.
 Anuj M.
 Donal F.
 Andreas S.
 Ali A.

Last weeks action Items:
- Steve to get the new XSD and XML to Fred to be put up on gridforge. (Steve, Darren to ask Steve about status)
o HostType to HostGroup needs to be changed in the XML and the document (Andreas, Steve)
- Team to come up with XML examples that will match the XSD and how it would map to the underlying Scheduler.
o Chris to come up with Use Cases and idea for process topology. (Darren)
o Preference Mechanism needs to be defined. (Look at the WS-Agreement mechanisms) (Andreas)
+ OWL needs to be looked at for ideas. (Ali to present to the group in 1 week) (Ali)

Document Status
o Andreas owns the document right now. 7/2
o Darren to have tech writer clean it up. 7/2
o Fred to review 7/13
o Posted on the list for review. 7/20
o Donal to review in August
o Document to be submitted to GGF for review by Sep 1.

New Action Items:
o JSIM - Review and comment (Group)
http://www.ggf.org/Public_Comment_Docs/Public_Comment_Documents.htm

o (Darren) to communicate with the JSIM group about JSDL and establish communication Channel

o (Darren) to let GGF know we need 2-3 sessions during the Monday and Tuesday. and 2-3 sessions the rest of the time.

[Text Slide A]

OWL Presentation

Three basic languages:

 OWL Light

 OWL +

 OWL +++

OWL is probably overkill for what we are doing.

It builds on RDF (Resource Description Framework) from W3C.

It has a Class Model built into it.

Semantic Web - CGS-WG?

We should keep our eye on it but for now it does not apply.

Look at DCML as well which is an implementation of OWL.

They have an extension mechanism as well.

http://www.dcml.org

GGF12

Hi,

You might know that plans for GGF12 are to split the programme so that the plenary sessions are to take place at the Sheraton in Brussels on the Monday and Tuesday morning of GGF12 week and the WG and RG sessions are to take place on the following two days at the University, some 20 mins away from the hotel by public transport. In this way attendees should be able to attend both the Plenary sessions and the WG and RG sessions.

A requirement has come to light for the first 2 or 3 of the JSDL-WG sessions to be held during the Plenary sessions on the Monday and Tuesday, in order to allow key contributors to attend and depart on Wed 22nd. We are planning to request 5 sessions all together.

We would like to gauge your opinion on this and to find out if there are any major reasons for avoiding this.

Many thanks in advance,

Ali, Darren, Steve

GGF12 Requirements:
- 2-3 Sessions on Monday and Tuesday
- 2-3 Sessions any other time.

A total of 5 sessions are required.
