

DAIS-WG Session 1: Discussion of Implications of WSRF

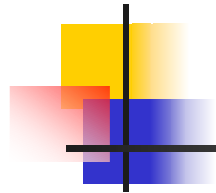

Norman Paton
University of Manchester

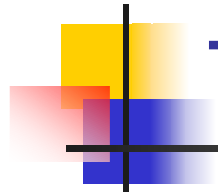

DAIS@GGF10

- DAIS Sessions:
 - Thu: 6-7.30pm: Grid Data Service Specification.
 - Fri: 8:30-10am: Specification Realisations.
 - Fri: 2-3:30: Information Dissemination and Charter.
- Friends and Family:
 - Fri: 10:30-12am: Information Dissemination BOF.
 - Fri: 4-5:30pm: CIM Based Grid Schema.

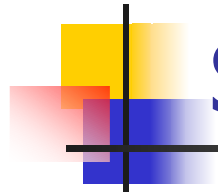

DAIS WG Activities Re WSRF

- Continue making progress:
 - Refactor specifications to minimise dependencies on not-yet-standard proposals.
 - Refine core features of specification for GGF11: operations, semantics, metadata.
- Plan ahead:
 - Explore design options for relating specification to WS-* proposals.

This Session

- Topics:
 - Impact of WSRF on OGSA Data Services proposal.
 - Mapping of core DAIS capabilities to WSRF, WS Composite Application Framework (WS-CAF), WS-Interoperability (WS-I).
- Aim: to move forward understanding of issues in DAIS and generate feedback on WSRF.

Structure of Session

- Implications for OGSA Data Services:
 - Allen Luniewski (30 minutes).
- Representing DAIS Functionalities using Emerging WS-Standards (60 minutes):
 - Simon Laws.
 - Allen Luniewski.
 - Savas Parastatidis.
 - Sastry Malladi.
